Property Description

Brand new construction! Take advantage by getting into the market and immediately creating equity and purchasing this home. If you are looking for your new home in the Uvita area, on the beachside of the Costanera, this is a home you should have at the top of your list. The house design is ideal for the area of Uvita. The local and trusted developer has built it with tall vaulted ceilings, and big glass sliding doors that open up to the outdoor wood deck and pool area from the master suite and the living room. This floor plan has two additional guest bedrooms down the hall on the right side of the home and with them a family size shared bathroom. Climate control is important when living this close to the beach so A/C is being installed in every bedroom and additional ceiling fans when you want to open up the glass doors to live inside and out. The beautiful custom kitchen with hard wood cabinets, quartz counters, and new appliances includes a large island that also doubles as dining area when friends drop in for a gathering.
